torrent CONSULTING | Agentforce

Agentforce Quickstart

Transform Your Operations with
Autonomous Agents in just 1 week

Organizations today face rising pressure to do more with less — faster service, greater efficiency, and better experiences. Legacy processes and siloed systems slow teams down and limit scale. Agentic technology offers a new path forward, automating routine work and unlocking time for higher-value impact.

HOW IT WORKS

In just one week, we'll stand up a working Agentforce proof of concept tailored to your business. You'll choose either a Service Agent or an Employee Agent, and we'll configure it to address a real use case — giving your team a hands-on look at how Agentic technology can drive results.

Service Agent

Enhance digital support by deploying an agent on your website or Experience Cloud site. Ideal for product microsites, Agentforce boosts engagement using your approved PDFs and content — no Knowledge Base required. Includes 1–2 use cases and integration with your case process.

Employee Agent

Empower your internal teams with an agent that delivers instant answers, automates repetitive tasks, and guides users through key processes. Ideal for streamlining HR, IT, or Ops requests inside Salesforce. We'll configure 1–2 high-impact workflows using your real business logic.

USE CASES

✓ **Pre-Meeting Account Snapshot:** Enable your Sales and Service reps to enter meetings fully informed and ready to add strategic value by summarizing recent activity, open support issues, contract details, and engagement history for a target account.

✓ **Real-Time Troubleshooting Assistant:** During live interactions, suggest next steps, surface relevant knowledge articles or SOPs, and offer resolution recommendations.

✓ **Policy & Process Assistant:** Answer internal questions about HR, IT, or operational procedures based on company documentation

TIMELINE

1. Kick-Off & Discovery →
2. Configuration and Set-Up →
3. Solution Demo →
4. User Testing →
5. Deployment & Training

PRICING

1 Week Agentforce Deployment	$12,500
